Institute data sheet

Everything the system needs to set up your institute and your website, in one place. Fill this in (or give the same facts to ChatGPT with the prompt file from Customize > Quick setup), get a .json file back and upload it. Pictures are not part of the file: the logo, the gallery and the photos of people are added on the Institute and Website tabs.

How to fill this in

- Leave out anything you do not have. Whatever is missing stays as it is now.
- Write plain sentences. Do not invent numbers, results, awards or names that are not true.
- Keep to the limits shown. A longer text is shortened, and extra items are dropped.
- Lists replace the list on the website. A trainer, partner or student whose name stays the same keeps the photo already added.
- Write your answers in the last column, or give the same facts to ChatGPT with the prompt file (Customize > Quick setup > Download prompt file). ChatGPT returns a .json file, which you upload on the same screen.

1. The institute

Shown on the website, on every certificate, ID card and fee receipt, and in emails.

What	What to give	Example	Your answer
Name (required) institute.name	The name of the institute, as it should be printed. (up to 120)	Sprint IT Academy	
Tagline institute.tagline	One line that says what you do. (up to 200)	Learn skills that get you hired.
